

## Product Data Sheet

Product Code: FMPE-1080

Product Name: PE Filler Masterbatch

BLAU BATCH supplies high-performance calcium carbonate filler masterbatches for polyolefin polymers. Our advanced formulation delivers excellent  $\text{CaCO}_3$  dispersion and high loading to optimize performance, enhance production efficiency, and reduce costs.

### General Description

This product contains:  $\text{CaCO}_3$ , resin and some additives. It's suitable blown film, shopping bags, garbage bags, agricultural films, liners, extrusion coating, lamination, and selected injection & extrusion applications using.

### Physical Properties:

| Property                         | Value                 |
|----------------------------------|-----------------------|
| Carrier                          | LLDPE                 |
| $\text{CaCO}_3$                  | 80% $\pm$ 2%          |
| Density @23°C (Specific gravity) | 1.7 g/cm <sup>3</sup> |
| MFI (2.16 kg/190 °C)             | 2.3 g/10 min          |
| Moisture content                 | < 0.05                |

### Technical Properties:

| Appearance (Surface color)  | White                            |
|-----------------------------|----------------------------------|
| Additives                   | Dispersion agent, processing aid |
| Processing temperature (°C) | 160-250                          |
| Expiry date                 | 6 months                         |
| Packing                     | 25 kgs per PP bag                |
| Storage                     | Keep at dry condition            |

### Method of Usage

Easy to disperse and homogeneous, Blau batch Filler Masterbatch can be directly added or pre-blended with resin using dosing units. It avoids contamination and ensures smooth processing.

#### *Caution:*

*This product may be adsorption moisture after a long-time storage or contact with moisture environment, please dry by dryer before used.*
